

LOVE ME, BUCKLE ME... EVERY TRIP, EVERY TIME, EVERY VEHICLE

Parents want to do everything possible to make sure their child is safe when traveling in the car. Correctly securing children in an age-appropriate car seat, booster seat, or seat belt is the most important action to prevent injury in a crash. Encourage caregivers to use a car seat that meets safety standards, is in good working order, and has not exceeded the car seat manufacturer's recommended life span.

Register Car Seats to Receive Recall and Safety Notifications

A recall is issued when a car seat manufacturer or the National Highway Traffic Safety Administration (NHTSA) determines a car seat creates a safety risk or fails to meet minimum safety standards. By registering a car seat, the manufacturer can contact you and guide you through the recall process. Register car seats in one of three ways.

By Mail with the registration card that came with the car seat.

- The car seat registration card includes the:
 - Model Number, and
 - Manufacture Date
- No postage is required to mail the card.

Tear off and mail this part

Consumer: Just fill in your name and address.

Register your car seat to receive important safety updates

Registering your car seat makes sense

The car seat manufacturer can contact you directly about recalls and safety notices.

Registering your car seat is easy

Send in the card that came with your car seat or complete a quick registration on the manufacturer's website. Your child's safety could depend on it.

SELECT MANUFACTURER GO TO WEBSITE

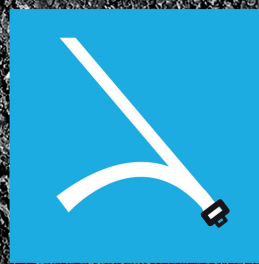

Need help?

If you are unable to register your child's seat with the manufacturer, contact NHTSA at NHTSA.ODI.ced@dot.gov.

Also, get recall notices from NHTSA

In addition to registering your car seat to receive recalls and safety notices from your car seat manufacturer, you can sign up to receive e-mail alerts from NHTSA about car seat and booster seat recalls.

- Do not delay in contacting the car seat manufacturer for a repair kit and fix the car seat as soon as possible.
- Most recall notifications permit the use of the car seat while you wait for the free repair kit.
- Using a recalled car seat or booster seat is almost always safer than letting a child ride in just a seat belt.
- Many problems are minor, but some can be serious.
- All recalls should be fixed.

LOVE ME, BUCKLE ME... EVERY TRIP, EVERY TIME, EVERY VEHICLE

Car Seat Manufacturer's Expiration Date

Always read and follow the car seat manufacturer's instructions to determine the recommended life span of a car seat. Expiration dates are determined by the car seat manufacturer and indicate the expected "useful" life span of the car seat. The life span varies and can be from 6 to 10 years. Expired car seats are not considered safe and should not be used.

- Check the car seat labels and instructions to determine the car seat expiration date.
- The date of manufacture can be found:
 - On the label that provides the model number.
 - The sticker may be found on the back, side, or bottom of the car seat.
 - Molded into the plastic shell of the car seat.
- The expiration date may be provided as a month and year or number of years from the:

Date of manufacture

OR

Date of original purchase.

Car Seat and Belt-Positioning Booster Seats Involved in a Crash

- Always follow the car seat manufacturer's guidance about replacing a car seat involved in a crash.
- Some car seat manufacturers:
 - Recommend a car seat be replaced after a crash of any severity, even a minor crash.
 - Follow the NHTSA recommendations that car seats be replaced following a moderate or severe crash.
 - NHTSA does not recommend that a car seat be replaced following a minor crash. Minor crashes are those that meet **ALL** the following criteria:
 - The vehicle was able to be driven away from the crash site.
 - The vehicle door nearest the safety seat was undamaged.
 - There were no injuries to any of the vehicle occupants.
 - The air bags (if present) did not deploy.
 - There is no visible damage to the safety seat.
